Art Unit: 1618

Claims 15-27 are presented for examination.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 15-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed invention is directed to "A method of treating columnar epithelial inflammation" using an analog of lipoxin A4. Such method requires treatment of unspecified disease and no evidence indicates that treatable disease was known to the applicant. In the absence of understanding the disease to be treated the artisan would not have accepted that applicant was in possession of the invention.
